Welcome to TAGGS

The Mission of the U.S. Department of Health & Human Services is to enhance the health and well-being of Americans...

The mission of the U.S. Department of Health and Human Services (HHS) is to enhance the health and well-being of Americans by providing for effective health and human services and by fostering sound, sustained advances in the sciences underlying medicine, public health, and social services. In support of its mission, HHS manages hundreds of programs which awarded 98,799 grants in fiscal year 2017. Tracking and accounting for HHS grant spending and providing high quality data to the public and external stakeholders is critical to fulfilling HHS's mission and strategic goals.

- ✓ HHS awarded 98,799 grants to over 12,000 recipients.
- ✓ HHS awarded approximately \$494 billion in grants.
- ✓ The 6 states receiving the most HHS grant funds were California, New York, Texas, Pennsylvania, Ohio, and Florida.
- ✓ The Centers for Medicare and Medicaid (CMS) awarded over 79% of all HHS grant dollars.
- ✓ The National Institutes of Health (NIH) awarded about 71% of all HHS awards.
- ✓ HHS awarded \$441 billion, or 89% of the total grant award dollars, to entitlement (or non-discretionary) grants.
- ✓ Of the \$53 billion in discretionary grants, HHS agencies awarded \$1.2 billion to 111 international recipients.
- ✓ Universities and colleges represent 36 of the top 50 HHS discretionary grant recipients.

The Annual Report

This annual report reflects a summary of grants HHS awarded during Fiscal Year 2017 (October 1, 2016, through September 30, 2017). Grants are a legal instrument reflecting the relationship between the United States Government and a State, local government, or other entity when “the principal purpose of the relationship is to transfer a thing of value to the State or local government or other recipient to carry out a public purpose of support or stimulation authorized by a law of the United States instead of acquiring (by purchase, lease, or barter) property or services for the direct benefit or use of the United States Government” (31 U.S.C. §6304).

This report does not include information related to technical assistance, which provides services instead of money; or contracts, which are required to be entered into and administered under procurement laws and regulations.

The public can view how HHS tracks and accounts for grant spending by visiting the Annual Reports section on the Tracking Accountability In Government Grants System (TAGGS) Website (taggs.hhs.gov/AnnualReport). Users can download the PDF report, or view it online for a fully visual and interactive experience. Both formats provide an open and transparent view of HHS’s grants portfolio: the PDF summarizes grant data at a high level displaying tables and charts for quick viewing; while the on-line report enhances the users experience by providing interactive maps and graphs that make it easy for visitors to explore award data in multiple views and provides tools to customize and display information, as well as download graphs and data.

Executive Summary

Our Year

Implementation of the Digital Accountability and Transparency (DATA) Act and the Grants Oversight and New Efficiency (GONE) Act were two major areas of focus for the HHS grants community during 2017. The purpose of the DATA Act is to establish government-wide data standards that can be shared by multiple communities and increase the availability, accuracy, and usefulness of Federal spending information. The purpose of the GONE Act is to improve the timely closeout of Federal grant awards to improve accountability and oversight in grants management. HHS workgroups put forth significant effort to insure the Department was well positioned to meet reporting requirements pertaining to the financial assistance community for both Acts. In addition to this work, the HHS grants community continued working on improving the quality of the agency's financial assistance data, and increasing transparency within federal programs.

Tracking Accountability in Government Grants System (TAGGS)

The data for the annual report comes from TAGGS which is managed by the Office of Grants and Acquisition Policy and Accountability (OGAPA). TAGGS has been the focal point for HHS's transparency efforts with financial assistance. Since its inception in 1995, TAGGS has been the central repository for all of HHS's grants data generated by HHS's Operating Divisions (OPDIVs) and the Staff Divisions (STAFFDIVs) representing nearly a half million distinct awards and over \$4 trillion in programs in HHS's grants portfolio.

Each year, HHS continues to examine the critical components of HHS's financial assistance business processes, policies, and systems to strengthen the data available to the public and for internal HHS usage. In addition to collecting, processing, and reporting all financial assistance data awarded by the OPDIVs and STAFFDIVs, TAGGS provides a single system and platform for displaying HHS data in meaningful ways that will be instrumental to informing leadership decisions and meeting legislative requirements including the Federal Funding Accountability and Transparency Act (FFATA), Digital Accountability and Transparency Act of 2014 (DATA Act), and the Grants Oversight and New Efficiency (GONE) Act.

HHS 2017 Organization

HHS is comprised of OPDIVs and STAFFDIVs, each with its own unique mission. The organization chart below presents the overall structure of HHS during FY 2017. The OPDIVs/STAFFDIVs were responsible for administering and managing 526 grant programs which are described in the Catalog of Federal Domestic Assistance (CFDA).

Note that in this report, Agency for Toxic Substances and Disease Registry awards are included in the Centers for Disease Control and Prevention grant funding data.

HHS Awards Overview

In FY 2017, the Department of Health and Human Services administered more grant dollars than all other federal agencies combined. HHS awards formula/block, entitlement, discretionary grant awards and cooperative agreements. HHS awarded approximately \$494 billion in grants for FY 2017. This included \$53 billion in discretionary awards and \$441 billion in formula/block and entitlement awards.

CMS, which administers the Medicare and Medicaid Programs, awarded 79% or \$393 billion of the total HHS grants fund; however, these awards are less than 2% of the total number of grants awarded by HHS. CMS, which administers the Medicare and Medicaid Programs, awarded 79% or \$393 billion of the total HHS grants fund; however, these awards are less than 2% of the total number of grants awarded by HHS. ACF had the second highest percentage of total HHS grant funds awarded at over 11%, or \$53 billion. This represented about 8% of the total number of grants awarded. NIH, which awarded about 5%, or nearly \$25 billion, of the total HHS grant funds, accounted for 71% of the total number of HHS grants.

The Annual Report website contains interactive maps and charts that display grant award and recipient data for HHS and its agencies. Those maps and some charts are not published in this document. The maps and chart data for HHS is presented in the appendices of this document. Please visit the TAGGS website at: <https://taggs.hhs.gov/AnnualReport> to view detailed information for all HHS Agencies.

Discretionary Grants

Discretionary grants are those that permit the Federal Government, according to specific authorizing legislation, to exercise judgment, or “discretion” in selecting the applicant/recipient organization, through a competitive grant process.

Discretionary grants commonly support activities such as demonstration, research, training, service, and construction projects or programs. Discretionary grants are sometimes referred to by the CFDA term “Project Grants.” The CFDA provides a full listing of all Federal programs available to State and local governments (including the District of Columbia); federally-recognized Indian tribal governments; Territories (and possessions) of the United States; domestic public, quasi-public, and private profit and nonprofit organizations and institutions; specialized groups; and individuals.

FY 2017 Grant Awards & Award Dollars

Agency Totals

The chart shows discretionary and non-discretionary awards grouped and displayed by awarding agency. Agencies with two circles awarded both types of grants. Colors indicate small to large changes from FY 2016 to FY 2017.

**Bubbles with the color grey represent little to no change from the previous year.

Top 5 Discretionary Grant Programs by Major Activity Type

Grant awards are classified by a 5-digit CFDA number and name. These CFDA awards are organized into major activity types: Research, Services, Training, and Other Activities.

The bar charts below show the Top 5 CFDA awards, based on award dollars, for each major activity type. The blue bars indicate award dollars; the red bars indicate the number of awards.

Research

Research (International)

Services

Services (International)

Training

Training (International)

Other

Other (International)

** "Other" programs include construction projects; grants for the planning and development of health programs and health resources; evaluations; and health infrastructure awards.

The Award History

The chart shows the number of awards and the amount of award dollars that HHS granted during the last 5 fiscal years*.

* Zero dollar awards, excluded in previous reports, have been included in this report which resulted in an increase of the total number of awards issued between FY 2016 and FY 2017. As HHS begins exploring different methodologies surrounding reporting award data, the total number of awards and award dollars issued might increase or decrease in future reports based on the methodology chosen.

Discretionary Award Types By Award Dollars

Based on the HHS mission, grant program descriptions, and the CFDA guidelines, the TAGGS system uses activity types to characterize the nature of the grant being funded. For the purpose of this report the activity types have been grouped into four major types (Research, Services, Training, and Other). HHS agencies self-select the activity type for awards based on the primary purpose of the grant.

HHS International Awards

HHS agencies have a long history of granting awards to international recipients, in support of a variety of healthcare and humanitarian efforts. These include genetic and immunological research, disease prevention, human development, and bolstering public health.

The pie charts below contrast agencies that spent the largest amount of FY 2017 international grant funds against those agencies awarding the largest number of FY 2017 international grant awards.

HHS Total Number of Awards

HHS Total Award Amounts

AGENCIES

Administration for Children & Families

Steven Wagner
Acting Assistant Secretary

Mission: To foster health and well-being by providing federal leadership, partnership and resources for the compassionate and effective delivery of human services.

Organization: ACF is guided by the vision of “children, youth, families, individuals, and communities who are resilient, safe, healthy, and economically secure.” We seek to advance that vision by providing federal leadership, partnership, and resources for the compassionate and effective delivery of human services.

ACF: Total Award Amounts and Award Number

Administration for Community Living

Lance Robertson

Administrator & Assistant Secretary

Mission: Maximize the independence, well-being, and health of older adults, people with disabilities across the lifespan, and their families and caregivers.

Organization: ACL works with states, tribes, community providers, universities, nonprofit organizations, businesses and families to help older adults and people with disabilities live in their homes and fully participate in their communities.

ACL: Total Award Amounts and Award Number

Agency for Healthcare Research & Quality

Gopal Khanna
Director

Mission: The Agency for Healthcare Research and Quality’s (AHRQ) mission is to produce evidence to make health care safer, higher quality, more accessible, equitable, and affordable, and to work within the U.S. Department of Health and Human Services and with other partners to make sure that the evidence is understood and used.

Organization: AHRQ awards discretionary grants, cooperative agreements, and contracts to carry out research projects, demonstrations, evaluations, and dissemination activities. AHRQ’s research projects examine the availability, quality, and costs of healthcare services; ways to improve the effectiveness and appropriateness of clinical practice, including the prevention of disease; and other areas of health services research. The information helps health care decisionmakers, patients and clinicians, health system leaders, and policymakers make more informed decisions and improve the quality of health care services.

AHRQ: Total Award Amounts and Award Number

Assistant Secretary for Planning & Evaluation

John R. Graham

Acting Assistant Secretary

Mission: The Assistant Secretary for Planning and Evaluation (ASPE) advises the Secretary of the Department of Health and Human Services on policy development in health, disability, human services, data, and science, and provides advice and analysis on economic policy. ASPE leads special initiatives, coordinates the Department's evaluation, research and demonstration activities, and manages cross-Department planning activities such as strategic planning, legislative planning, and review of regulations. Integral to this role, ASPE conducts research and evaluation studies, develops policy analyses, and estimates the cost and benefits of policy alternatives under consideration by the Department or Congress.

Organization: ASPE, within the Office of the Secretary, is organized into principal offices: Office of Disability, Aging and Long-Term Care Policy, Office of Health Policy, Office of Human Services Policy/HHS' Chief Economist, and Office of Science and Data Policy, as well as several smaller ones. Each of the major offices is headed by a Deputy Assistant Secretary.

ASPE: Total Award Amounts and Award Numbers

Assistant Secretary for Preparedness & Response

Robert Kadlec, M.D.
Assistant Secretary

Mission: To lead the country in preparing for, responding to, and recovering from the adverse health effects of emergencies and disasters by supporting our communities' ability to withstand adversity, strengthening our health and response systems, and enhancing national health security.

Organization: ASPR, as delegated by the Secretary, leads the federal public health and medical response to public health emergencies and incidents covered by the National Response and National Recovery Frameworks. ASPR serves as the principal advisor to the Secretary on all matters related to public health and medical emergency preparedness and response and leads a collaborative approach to the Department's preparedness, response and recovery portfolio.

ASPR: Total Award Amounts and Award Number

Centers For Disease Control

Anne Schuchat, M.D.
(RADM, USPHS)
Acting Director

Mission: CDC works 24/7 keeping America safe from health, safety, and security threats, both foreign and domestic. Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, CDC fights disease, and supports communities and citizens to do the same. CDC is the nation’s health protection agency – saving lives, protecting people from health threats, and saving money through prevention.

Organization: CDC has six Center, Institute, and Offices (CIOs) which allows the agency to be more responsive and effective when dealing with public health concerns.

CDC: Total Award Amounts and Award Number

Centers for Medicare & Medicaid Services

Seema Verma
Administrator

Mission: To ensure that the voices and needs of the populations we represent are present as the agency is developing, implementing, and evaluating its programs and policies.

Organization: CMS covers 140 million people through Medicare, Medicaid, the Children’s Health Insurance Program (CHIP), and the Health Insurance Marketplace. But coverage isn’t our only goal. To achieve a high-quality health care system, we also aim for better care at lower costs and improved health.

CMS: Total Award Amounts and Award Number

Food & Drug Administration

Scott Gottlieb, M.D.
Commissioner

Mission: To protect the public health by assuring the safety, effectiveness, and security of human and veterinary drugs, biological products, medical devices, our nation’s food supply, cosmetics, and products that give off radiation. The FDA is also responsible for advancing the public health by helping to speed innovations that make medicines and foods more effective, safer, and more affordable; and helping the public get accurate, science-based information they need to use medicines and foods to improve their health.

Organization: The Food and Drug Administration (FDA) is a scientific regulatory agency that is responsible for protecting and advancing the public health in the United States: FDA’s responsibilities cover a wide range of regulatory activities. FDA decisions affect every American on a daily basis. Annually, consumers spend nearly \$1.5 trillion, or more than 20 percent of all consumer expenditures, on FDA-regulated products.

FDA: Total Award Amounts and Award Number

Health Resources & Services Administration

George Sigounas, MS, Ph.D.
Administrator

Mission: To improve health and achieve health equity through access to quality services, a skilled health workforce and innovative programs.

Organization: Tens of millions of Americans get affordable health care and other help through HRSA's 90-plus programs and more than 3,000 grantees.

The Health Resources and Services Administration (HRSA), an agency of the U.S. Department of Health and Human Services, is the primary Federal agency for improving access to health care by strengthening the health care workforce, building healthy communities and achieving health equity. HRSA's programs provide health care to people who are geographically isolated, economically or medically vulnerable.

HRSA: Total Award Amounts and Award Number

Indian Health Service

RADM Michael D. Weahkee
Acting Director

Mission: To raise the physical, mental, social, and spiritual health of American Indians and Alaska Natives to the highest level.

Organization: The Indian Health Service (IHS) provides a comprehensive health services delivery system for American Indians and Alaska Natives with opportunity for maximum tribal involvement in developing and managing programs to meet their health needs. IHS serves a population of approximately 2.2 million American Indians and Alaska Natives.

IHS: Total Award Amounts and Award Number

National Institutes of Health

Francis S. Collins, M.D., Ph.D.
Director

Mission: To seek fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to enhance health, lengthen life and reduce illness and disability.

Organization: National Institutes of Health (NIH) is the primary federal agency for conducting and supporting medical research. Helping to lead the way toward important medical discoveries that improve people’s health and save lives, NIH cures for common and rare diseases. Comprised of 27 Institutes and Centers, NIH provides leadership and financial support to researchers in every state and throughout the world.

NIH: Total Award Amounts and Award Number

Office of the Assistant Secretary for Health

Adm. Brett P. Giroir, M.D.
Acting Assistant Secretary

Mission: Mobilizing leadership in science and prevention for a healthier nation.

Organization: OASH oversees 12 core public health offices – including the Office of the Surgeon General and the U.S. Public Health Service Corps – as well as 10 regional health offices across the nation and 10 Presidential and Secretarial advisory committees.

OASH: Total Award Amounts and Award Number

Office of Global Affairs

Garrett Grigsby
Director

Mission: To promote the health of people of the world by advancing the Department of Health and Human Services' global strategies and partnerships, thus serving the health and well-being of the people of the United States.

Organization: OGA, within the Office of the Secretary, represents the Department to other governments, other federal departments and agencies, international organizations, and the private sector on international and refugee health issues.

OGA: Total Award Amounts and Award Number

Office of the National Coordinator for Health Information Technology

Don Rucker, M.D.
National Coordinator

Mission: ONC is the principal Federal entity charged with coordination of nationwide efforts to implement and use the most advanced health information technology and the electronic exchange of health information. The position of National Coordinator was created in 2004, through an Executive Order, and legislatively mandated in the Health Information Technology for Economic and Clinical Health Act of 2009.

Organization: The Office of the National Coordinator for Health Information Technology is at the forefront of the administration’s health IT efforts and is a resource to the entire health system to support the adoption of health information technology and the promotion of nationwide health information exchange to improve healthcare. ONC is organizationally located within the Office of the Secretary for the U.S. Department of Health and Human Services.

ONC: Total Awards Amount and Awards Number

Substance Abuse & Mental Health Services Administration

Elinore F. McCance-Katz, M.D., Ph.D.
Assistant Secretary

Mission: It is SAMHSA's mission to reduce the impact of substance abuse and mental illness on America's communities.

Organization: The Substance Abuse and Mental Health Services Administration (SAMHSA) is the agency within the U.S. Department of Health and Human Services that leads public health efforts to advance the behavioral health of the nation.

Prevention, treatment, and recover support services for behavioral health are important parts of the health service systems for our communities. These services work to improve our health and minimize cost to individuals, families, businesses, and governments. However, people with mental and/or substance use disorders often do not get the treatment they need.

SAMHSA: Total Award Amounts and Award Number
